To Our Customers and Friends:

It is with great pleasure that we present to you our catalogue for 1955. First of all, we want to extend greetings and best wishes for a prosperous and successful glad year in 1955 and thank each and every one of our customers for their patronage. We hope that we may have the pleasure of receiving your valued orders again. Those who have known and bought from Birchville Gardens in the past need no introduction. To those unacquainted with us we wish you would favor us with a trial order this season. We know we will be able to satisfy your needs.

We have been asked by many people to evaluate the newer varieties that we are growing. This is a difficult task to do and can lead to many a lively discussion among glad fans. But, this review is based on our own observations in the fields at Birchville Gardens. Our soil is sandy and the performance of some varieties may differ in other types of soil or in different climates. We give you this review, however, with the hope that it will be interesting reading and that it will assist you in the selection of varieties.

WHITE — This section has become one of the strongest. Such varieties as Mother Fisher and Florence Nightingale are now well established as outstanding glads. The huge spikes of Snowclad and White Excelsior look unusually promising and may soon take over this class. In the 401 division White Sails and Carmine Eyes are definite steps ahead.

CREAM — Adorable from K & M has greatly strengthened this class. It has vigor and clear color and will become a leading cut-flower. Leif Erickson, another K & M variety, will be the big winner at the shows, since it is able to open ten well-placed florets on good spikes. Columbia, also classified as a cream, is one of the most beautiful and will certainly go a long way.

YELLOW — In our opinion Fort Knox deserves the number one spot. It has good color and spikes and should easily win over Gold at the shows. Prospector and Gold are surely beautiful and really have class. Forysthia, with its greenish sheen, is a favorite of ours. Gold Bank and Golden Dawn should be considered by cut-flower growers. If you like them tall, Gelber Hercules certainly will satisfy you. All of these are big improvements in this class.

BUFF — Peach Glow and Daybreak are good additions to this weak class. Both have good height and no doubt will be well received when better known. The new Afterglow will greatly strengthen the buff section and should become a show winner. Patrol, a wonderful commercial and show glad, is a must for all.

ORANGE — The huge spikes of Atlantic are certain to catch the eye and can win at any show. It certainly is a grand sight to see a row of these in bloom. Valentine is a beauty that has been overlooked. Large spikes of show quality.

SALMON — King Size is just what its name implies. It's a king in size that can really open them up. We can heartily endorse this for a Grand Champion winner. To me, it has been a pleasure to see spikes of Boise Belle and Boldface. Both are very striking and easy growers. They are recommended for both home gardeners and commercial planting.

SCARLET — Welcome, from Winston Roberts, is certainly going to receive a royal welcome from all. It is very early and makes beautiful spikes. It will become one of the best commercial varieties. Firelight, also early, is one that has been overlooked and in our estimation will become a leader in this class. It makes tall spikes and is just about a 100% cutter. Harold K. has size and is one of the easier varieties to grow. Though there are not many scarlets, these are dandies both for show and cutting.

LIGHT PINK — Pink Pride is certainly a giant that will open ten florets. It will not, however, attain the height of King Size. Look, also very large, is one of the best growers we have. For real pastel beauty, few varieties can equal Clarence D. Fortnam, a good grower that opens a ribbon of bloom.

MEDIUM & DEEP PINK — Sweet Sixteen is one we recommend. It is a very pleasing pink which cuts close to 100% good spikes. One of Carl Fisher's finest varieties. Friendship is very early and is lovely for florist work. For those who like them large, Benares will indeed be a pleasant surprise displaying 8 open on very tall spikes.

LIGHT RED — Two very important new glads have been added to this group. They are Early Red and Red Radiance. Both have grand color and are easy growers. They will become leading cut-flower varieties. Leah Gorham, always popular with visitors, is flashy and catches the eye.

DEEP RED — Festival is without a doubt outstanding, and we recommend that you try a few. Crimson Tide has very heavy texture and ruffling. These qualities, combined with sturdy growth, make it outstanding as a novelty. The grand variety Harrisburger has everything from beauty to good spikes. It unquestionably is here to stay. Jim's Delight, our 1955 introduction, will delight you with its big spikes and grand iridescent color.

BLACK RED — Always popular with visitors are Attaturk and Negus. Attaturk is the darkest variety we know. Negus is our all-around favorite since it has richness of color and all the good growing qualities. We wish the florets were larger though. Dark David makes huge spikes and can easily win in its class.

LIGHT & DEEP ROSE — This is certainly the most improved class with such wonderful varieties as Andrena, Edgewood, Elmer's Rose, Rosita, Traveler and Shirley Irene. Andrena is one of the most beautiful and is a dandy commercial. The new Traveler opens 10-12 beautiful florets. I believe we will hear a lot from this one. Rosita, with its tall spikes and fluted florets, is highly recommended. Shirley Irene should satisfy those who like the Corona type. Elmer's Rose has good color and growing habits and is a must for flower growers. The new Rosy Veil is a 100% producer of good spikes. It is somewhat on the order of Spic & Span, but in our opinion a better grower.

DEEP ROSE — Aristocrat has vigor and great size and is one of the tallest glads grown. Karen must be seen to be appreciated. It is distinguished by long flowerheads and wonderful keeping qualities.

LAVENDER — Francesca, after several years of testing, has proved without doubt to be one of the most beautiful glads. It has good growing habits too! If you don't grow Francesca we strongly recommend you do. Princess, with its tall spikes, may soon take over as the best show variety. It makes longer heads and taller spikes than Elizabeth the Queen. Tyrone certainly has the making of the best cut-flower we have seen to date in the lavender class. It has a wonderfully clear color and makes good spikes. Sterling, Falcon and Gail are all good and reliable.

PURPLE — King David and the Rajah—take your pick! Both are outstanding and have a host of friends. They are so different from one another we advise you to grow both. Lustige Witwe is a most attractive novelty and is always spotted by visitors at the garden as a must.

VIOLET — Pfitzer's Sensation has wonderful color and is certainly one of the finest. Salman's Sensation is a huge grower and will just about clean up its class at the shows. Venus, a newer introduction, certainly will win at the shows, too. It grows tall and opens 8 beautiful soft lavender-blue blooms that are perfectly placed. Crater Lake has both size and vigor and may prove to be best as a cut-flower. Violet Charm and Eridge are both worthy of a trial. And if you like them flashy, try Blue Devil.

SMOKY — Tan-Glo goes all the way as a show variety since it makes large spikes and is capable of opening 10 to 12 perfectly placed florets. Prairie has unusual color and is certainly one of the very best. Mesa Mist is a consistent grower and is a favorite with our visitors because of its clear grey color. It is one we recommend that you try.

In the foregoing paragraphs we have endeavored to give you an honest, concise appraisal of some of the newer varieties. We hope Mother Nature will smile more generously on us in 1955 and leave hurricanes Carol, Edna and Hazel as only memories. Those young ladies surely did not add to the success of our growing season.

We welcome your visits to Birchville Gardens to inspect the fields. We are especially anxious for you to inspect the bulb house, in which we take special pride. Our sincere wish is for you to find success and happiness in your 1955 gladiolus garden.

Sincerely yours,

JAMES A. MILO

AFTERGLOW

CARMINE EYES (Harris 55) 401-70

Ever since we discarded Margaret Beaton we have searched for a variety to take its place. Since Carmine Eyes is a fine performer in all ways, our search has come to an end. Here is a fine early white with two carmine-cherry spots on the two lower petals that look like two eyes staring at you. It is slightly ruffled with good texture. Grows 56-58 inches tall, with a 25 inch flowerhead, 20 buds, 8 open, 6 to 8 showing color. Carmine Eyes is a good grower from all size

bulbs and is a wonderful propagator. Bulblets bloom freely.

AFTERGLOW (Harris 55) 516-80

An enchanting light apricot somewhat like Patrol, without other markings. This grows much better than Patrol, however. It is an ideal commercial with show qualities as well. It consistently makes five-foot spikes that are always straight. Opens 7-8 slightly ruffled florets of 5½ inch size on a 20-22 bud spike. A good propagator and grower with healthy plants and bulbs.

We believe the master hybridizer Jack Harris has given us a glad that is a step ahead in its class. Our florists gave Afterglow a royal welcome this past season and I am sure you, too, will welcome Afterglow to your list of fine glads.

JIM'S DELIGHT

Reds may come, reds may go, but we predict Jim's Delight is here to stay!! Here is a real fine variety that we found in some stock of Pactolus we bought from Holland 5 years ago. It is a beautiful sanguine red, similiar to Red Charm. The real beauty of this flower lies in its irridescent quality. The depth of the red changes as you look at it from different angles. Surprisingly enough, you can even see a bronze effect at certain angles. We honestly believe that Jim's Delight will become one of the greatest reds of all time. It is a wonderful grower. It makes spikes up to 60 inches. Opens 6-8 on a 20 bud spike. Florets are firmly attached and well-placed. Propagation is very good.

It has been voted most popular variety and most beautiful basket in show. It certainly is an easy winner in its class. A good supply sets the price where you can afford to get a start in this really outstanding glad. BE SURE TO TRY JIM'S DELIGHT.

FORSYTHIA

FROM EDWARD HOWELL'S

LORELEI

Tall ivory cream shading to deep cream or pale yellow in the throat. Has been grown 6 feet tall with 20 bud spikes measuring up to 37 inches—8 to 10 open, with 7 average and 8 more in color. Spikes are always straight. Field grown stock will average 18 buds with 6 to 7 open, all buds opening to the tip in water. A very rapid propagator. Every blublet germinates and with early planting and good culture will bloom and make number 1 bulbs. My wholesale florist takes all he can get, even spikes from bulblets. He says it will be the best cream or white commercial glad when enough stock is available.

Awards so far include—Runner-up All American Selections, Award of Merit, score 87 as 506, Chicago

International 1953, most beautiful, Tennessee 1954 (Dr. Casson said that he cut this spike one day too soon and refrigerated it or he would have had grand champion. Nominated for N.J.G.S. seedling award for 1954. Conditions of award—Seedlings must score A or better on 3 spikes and be inspected growing in field by three members of the seedling award committee and approved as to growth habits, health, propagation, etc. Only one other seedling has received this award. FROM EDWARD HOWELL'S

LILAC TIME 466

Early translucent pastel lavender. 100% cutter. Always straight and tall. 26 to 28 inch flowerhead, 6 to 8 florets open. Makes plenty of bulblets which germinate 100%. Awards so far include American Home Award at Lebanon, 1954, B+ single spike entry, blue ribbon vase at Binghampton and blue ribbon 3 spike at Burholme. Growers in my area are giving up on Elizabeth the Queen as a commercial. All who have seen Lilac Time want to try it to take the place of Elizabeth. It has been more dependable for me. The spikes that I took to Lebanon were not the best spikes of Lilac Time that I have grown. I had not intended to show it or to introduce it at present. I was going to propagate it and grow it for my wholesale cut-flower trade. The local florists grab it on sight. My wholesaler has been trying to get me to grow Lilac Time, Lorelei and Tafetta exclusively for cut-flowers. Retail prices will be \$3.00 any size bulb with 10 bulblets at \$2.50 with the purchase of a bulb.

TAFETTA 462, 1954

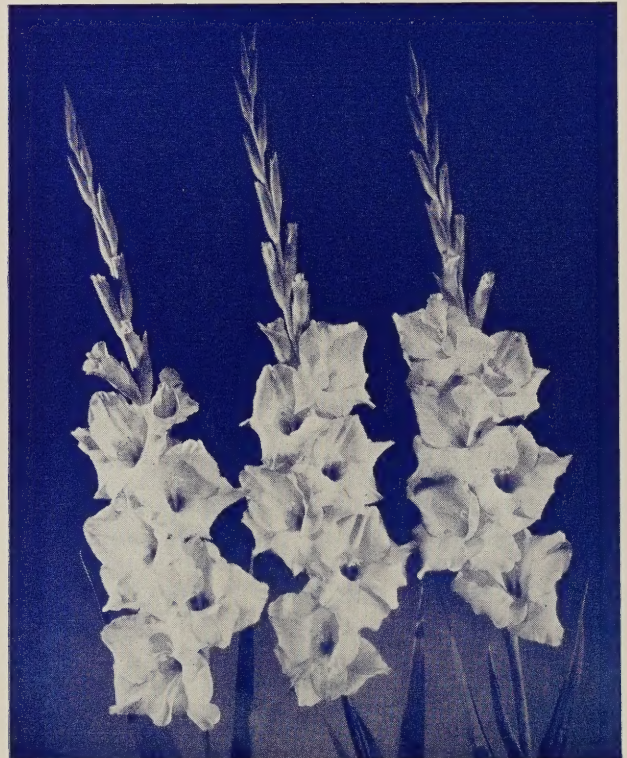

Tafetta was introduced last year without much of a build up. It had never been shown at any major show until this year. I have had at least 3 blue ribbons with it this year. Tafetta can win when well grown. Its chief value lies with the florist. My wholesaler wants me to grow it exclusively for cut-flowers. The florists grab it on sight, at a good price. They say it is the best new color they have seen in a long time. The color is medium rose-pink, in between Mallow and Trails End, but without the faults attributed to these varieties. 6 to 8 wide open florets open on a medium sized spike of 18 buds. Excellent propagation and cutter even from small bulbs. Tafetta blooms in about 80 days. The color is a light to medium rose-pink with a creamy-yellow throat. The texture suggested the name. Retail—Large \$1.00, Medium 75¢, small 50¢, bulblets 10 for \$1.00.

FROM JOHN FLAD

MONONA (566) (85 Days)

A lavender similar in color to Elizabeth The Queen, but lacking the blotch in the throat. It makes a tall spike, carrying 22 buds, opening 10 to 12. Good propagator and germinator, with bulblets blooming freely. A brilliant lavender color and a good commercial prospect. Named for one of Madison's beautiful lakes.

Priced: L \$2.00; M \$1.50; S \$1.00; Blbts. 25 cents each; 10 for \$2.00.

COPPERSHEEN (416) (76 Days)

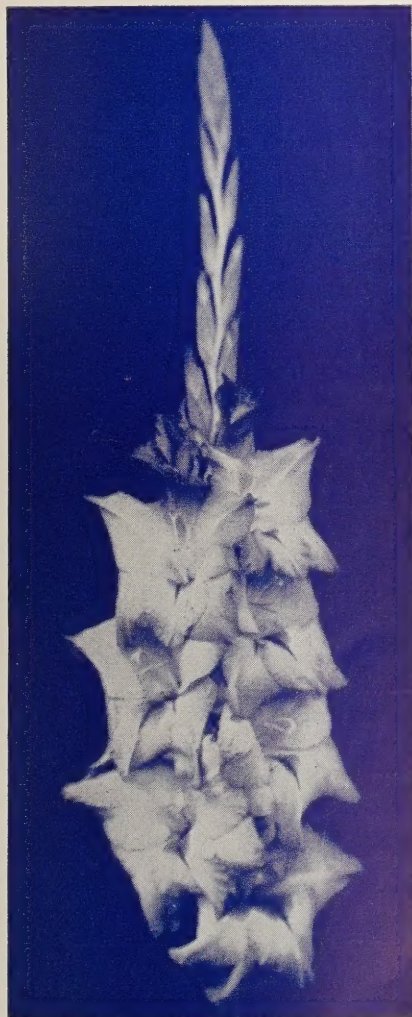

Something new and unusual in a copper colored floret with a rich and pleasing plum colored blotch in the throat. Florets are medium ruffled, opening 6 to 8 on a 20-bud spike. An exceptionally good commercial cutter; spikes are tall and willowy.

Priced: L \$1.00; M \$.75; S \$.50; Blbts. 10 for \$1.00.

COMBAT (442) (70 Days)

Combat is a rich deep pink with a cream throat. The plant is healthy and sends up a tall 20-bud spike, opening up to 10 slightly ruffled florets. Propagation and germination are very satisfactory. Winner of 1954 American Home Achievement award in Southern Wisconsin and Northern Illinois Seedling Show.

Price: L \$2.00; M \$1.50; S \$1.00; Blbts. 25 cents each; 10 for \$2.00.

PIRATE CHIEF

ROSY VEIL (Magnuson 55)

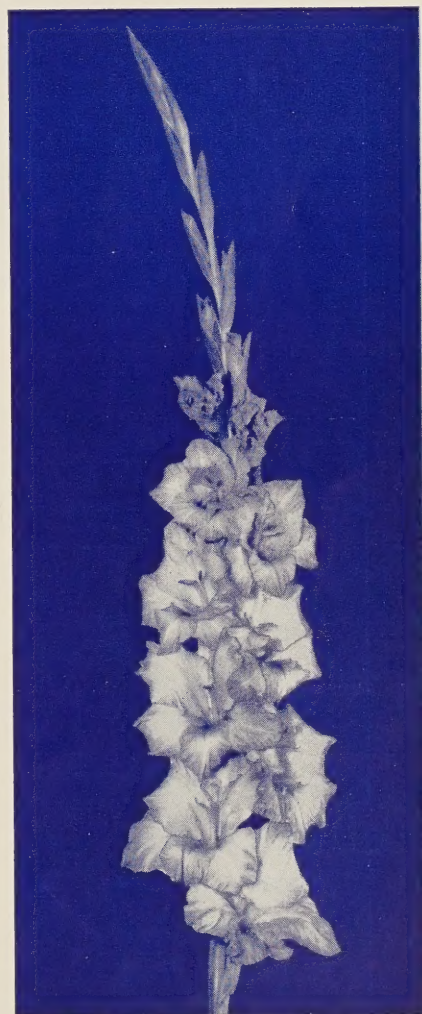

From a new hybridizer comes this wonderful commercial and exhibition glad. The color is a medium rose with an attractive red throat that is not too conspicuous. Opens 8 florets with 6 or more showing color on a 20-22 bud spike. Florets are ruffled with very good substance and attachment and are perfectly placed. It is a wonderful grower of good cutting spikes. From what we have seen of Rosy Veil it is a rosy Spic & Span, but I sincerely believe this is a better grower. Here is a glad with every good quality you could demand of a glad either commercial or exhibition — color, texture, form, health and excellent propagation. A wonderful cut-flower prospect.

SPECIAL NOTE

This catalogue comes to you with our compliments. Each year we try to improve upon its attractiveness and give you the latest up-to-date information. But, due to increasing costs of labor and material, the expense of printing thousands of catalogues is becoming greater each year. Therefore, we must eliminate people who are merely catalogue collectors and those who have been forced to give up gardening. This is necessary if we are to practice economy, which is the basis of sound business. Therefore, if you like our catalogue and wish to continue receiving future copies, either send us an order or mail us a postcard stating you are still interested.

To our many friends and customers, who through their loyal patronage have made this catalogue possible, we extend our sincere thanks and appreciation.

HOW TO READ PRICES

At the end of the description of each variety appears prices for Large (L), Medium (M), and Small (S) Bulb. Bulblets (Blbt.) In some cases the letter has only one price after it meaning that is the price for one bulb, of that size and variety. For instance, under Anne Sherman appears (L 1-.50) (M 1-.35) etc. This means that one large bulb costs .50 cents, a medium .35 cents. Also that 8 bulblets cost .25 cents, etc.

Sometimes the base price is given for 2 or more bulbs, meaning that not less than that number is sold. For instance, Aristocrat (L 2-.30) (M 2-.20) meaning that not less than those quantities are sold.

You may buy 10 bulbs of any size and variety for 8 times the single bulb price and 5 can be bought at one-half the 10 rate.

ADORABLE (K & M) 406-80

An utterly charming sulphur cream shading to an amber with a creamy throat blotch. Blooms are slightly ruffled and buds are greenish. These greenish buds and deep cream blooms produce a very beautiful color effect. It opens eight on a very tall stem. Good placement and attachment of its 20 buds. This is the best real cream variety we have seen.

(L 1-.50; 10-4.00) (M 1-.35; 10-2.80)
(S 1-.25; 10-2.00) (Blbts. 8-.25; 100-2.50)

AFRICA

A brown granite color with a geranium red base. Certainly an unusual glad. Should win easily in its color class. Opens 6 well placed florets on good spikes. An interesting novelty that certainly is worth a trial.

(L 1-.50; 10-4.00) (M 1-.35; 10-2.80)
(S 1-.25; 10-2.00) (Blbts. 5-.25; 100-4.00)

ALOHA (Graff 50) 516

A tall growing glad that is apricot color with a lighter throat. It is a strong grower with straight wiry spikes and good placement.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 10-.60) (Blbts. 10-.25; 100-2.00)

AMERICAN BEAUTY (Barrett 48) 464-80

A medium deep rose with a throat several shades deeper than Miss Wisconsin. It is heavily ruffled and grows to a height of 60 inches, carrying 20 buds on a 22-inch flowerhead and opening 7 to 8 five inch florets.

(L 1-.25; 10-2.00) (M 1-.20; 10-1.60)

Miniature and Small Varieties

The popular trend toward miniatures is rapidly developing in leaps and bounds. There are probably several reasons for this but we think the most important is because miniatures are the perfect home arrangement flower.

CULTURAL HINTS

Packages of bulbs must be opened as soon as received and the bulbs stored in a cool, dry place until planting time.

PLANTING DATES. Any time from early Spring until the first of July. The blooming season can be prolonged until frost if planted at intervals of three weeks.

WHERE TO PLANT. Glads should be planted in open, sunny places, away from buildings and trees. They are primarily cut-flowers and should be planted in rows such as a vegetable garden.

SOIL. Glads will grow in any kind of soil but do best in a sandy loam. The soil must be well drained. It pays to spade deeply.

FERTILIZING. The amount to use will depend upon the fertility of your soil. Any good commercial fertilizer will give good results or you can ask your dealer for the fertilizer commonly used on potatoes in your locality. Most growers prefer the fertilizer in the bottom of the trench as the bulbs are planted. Care must be taken to see that the fertilizer is mixed with the soil and then about 2 inches of soil placed over the mixture. The bulbs should then be set in the row, leaving the 2 inches of soil between them and the fertilizer.

DISINFECTING. All bulbs and bulblets should be dipped in disinfectant in order to kill Thrip and to prevent possible disease infection on the bulbs. Nothing will cure bulbs affected with any of the rots. Bulbs showing rot should be discarded at once. (See formulas for Dips and Sprays.)

PLANTING. Plant from 3 to 6 inches deep. Small bulbs should be planted about 3 inches deep and larger sizes up to 6 inches deep. If you have a heavy clay soil 4 to 5 inches will be deep enough. The bulbs should be set not closer than 4 inches apart in the rows and the soil must be firmed well after planting.

WATERING. Glads need plenty of moisture. To produce top bloom they should have 1½ to 2 inches of water per week. Whenever the natural rainfall fails to supply this quantity be sure to put it on in the form of irrigation. It is best to water just once or twice a week, soaking the soil well, so that the roots are not pushing upward to the surface of the ground.

DIGGING. Bulbs should not be dug until about 6 weeks after blooming, in order to mature the bulbs. A good sign is to watch the foliage and when it begins to turn brown, dig at once. After the tops are cut off, close to the bulb, dry the bulbs in the air in trays or boxes. It is best not to allow the sun to shine directly on them while drying. After 2 or 3 weeks of drying the old bulb and roots can then be removed. DO NOT remove the husks as this protects bulb during storage.

STORAGE. After drying, the bulbs must not be exposed to freezing temperatures. The ideal storage temperature is 38 to 45 degrees. Bulbs should not be placed too deeply in the boxes as they need air while in storage.

When you get ready to store your bulbs, be sure to give them a light dusting of 5% D.D.T. This will eliminate any danger of thrip feeding on your bulbs during storage period. Glads are easy to grow and anyone, even a beginner can grow the finest show flowers!

FORMULAS FOR DIPS AND SPRAYS

LYSOL DIP

4 tablespoons of Lysol	or	1 Pint Lysol
3 gallons of water		25 gallons of water

Soak bulbs in the Lysol solution for at least 3 hours and no longer than 6 hours; soak bulblets overnight or 12 to 14 hours. After bulbs or bulblets are removed from the solution, allow to drain for 30 minutes and plant same day as treated, preferably while still wet.

BICHLORIDE OF MERCURY

1 oz. Bichloride of Mercury	7 gallons of water
-----------------------------	--------------------

Soak 10 to 12 hours immediately preceding planting. Plant wet. Must be used in an earthen or wooden container.

THRIP SPRAY

2 ounces Tartar Emetic	2 ounces brown sugar	3 gallons water
------------------------	----------------------	-----------------

Mix well and spray weekly after foliage is in third leaf.

or

½ lb. D.D.T. (50%)	½ pint liquid soap (Germicidal)	25 gallons of water
--------------------	---------------------------------	---------------------

For small plantings the following D.D.T. spray is reported as giving good results:

1 rounded teaspoonful D.D.T. (50%)	½ teaspoonful Dreft	1 gallon water
------------------------------------	---------------------	----------------

DUSTING—The easiest and most efficient means of controlling Thrip is to dust the foliage of the plants with 5% D.D.T. Many types of dusters are available and one can be obtained to suit your size planting. Begin dusting when plants are in third leaf and continue about every two weeks. If this is done you can say goodbye to Thrip!

CAUTION: Bichloride of Mercury, Lysol, New Improved Ceresan, Tartar Emetic, and D.D.T. are poisonous and care should be taken in handling and storing these.

LONG SEASON COLLECTION

To have blooms of a certain variety over a long period of time we want to recommend especially one or more of the following Specials. These Specials consist of various sizes of bulbs of each variety. If you are not in the habit of buying Medium and Small bulbs you will be amazed at the fine blooms you will get from these.
